

Patient reported outcome

A patient reported review with over **57K** users demonstrated **54%** sustainable pain reduction after 18 months for people with severe pain, and **61%** pain reduction for people with moderate pain.

These outcomes were achieved with no content, coaching or physical therapy treatment.

Pair T-test Initial rate and last rate				
Initial pain level	AVG Dif	STDV	N	P-value
Severe	-3.02	3.15	16,981	>0.001
Moderate	-1.55	2.67	40,522	>0.001
